WORK EXPERIENCE

BoomRoom

July, 2022 – Sept, 2022

Front End Developer / Consultant

- Developed the fitness application's desktop and mobile menu with animation and responsiveness for both the instructor and client pages using Sails.js.
- Reviewed and revised all page templates and elements to ensure consistent sizing and layout across every breakpoint. Fixed minor inconsistencies with regard to button styling, font sizing, line height, and margins.
- Tested and deployed code to production and staging environments, fixing functionality issues such as email verification and class sign up.

Pacific Links Foundation

Nov, 2021 – Present

Volunteer Tutor

- Initiated and led the development of programs and curricula for Vietnamese students in grades 10-12, which emphasized HTML, CSS, and basic web programming.

TD Seafood Market

May, 2020 – Feb, 2021

Assistant Manager

- Managed the online presence for the business, including social media and website, designing marketing material and creating spreadsheets for monthly expenses and revenue.

Nguyen Ventures, LLC

Apr, 2019 – March, 2020

Owner

- Founded a food truck and catering business with clients and customers throughout the Triangle.
- Designed the website, brand identity, and marketing materials using Illustrator, HTML, and CSS.

PROJECTS

Stock News

- Worked in a team of 3 to develop a stock research app that fetches real-time data from third party APIs. Managed all stages of development, including wireframing, mockups, coding, and testing. Created a responsive front-end with PureCSS, and JS.

Vinyl is Plural for Vinyl

- Led development of front-end to create an app for users to trade, sell, and buy vinyl records using DiscogAPI for data and Bootstrap as framework.

Weather Dashboard

- A web application for presentation of weather conditions for any location, based on data from OpenWeather with the implementation of Bootstrap framework.

EDUCATION

UNC Chapel Hill

Full Stack Coding Bootcamp

Jan, 2021 – July, 2021

BS, Psychology

Aug 2014 – May, 2018

- Completed computer science focused courses, including Java and discrete structures.
